Senior Software Engineer

Portfolio · LinkedIn · Sydney, AU · Australian citizen

Founding-minded frontend engineer specialising in scalable UI systems, high-performance React applications, and design systems used by millions.

CORE FOCUS

Design systems · React & TypeScript · Product UX · Performance · Accessibility · Scalable UI architecture

EXPERIENCE

Commonwealth Bank of Australia (CBA) — Senior Software Engineer

07/2025 – Present · Contract

Large-scale, security-critical banking platform serving millions of customers across payments.

- Delivering end-to-end frontend and API-driven features for Address Book functionality.
- Designing and evolving GraphQL services and Federation schemas to integrate legacy REST systems cleanly.
- Uplifting engineering quality through reviews, testing strategy, and architecture documentation; interviewing 20+ senior and principal engineers.

NSW Department of Customer Service - Spatial Services — Senior Front-End Engineer

02/2025 – 06/2025 · Contract

Government spatial data platform delivering map-based datasets used across NSW agencies.

- Took ownership of frontend delivery for a spatial data portal, shipping React and TypeScript features.
- Integrated with complex ESRI APIs, contributing to API discovery, validation, and frontend architecture in the absence of a dedicated backend team.
- Established CI/CD, linting, and testing standards; ensured WCAG 2.1 accessibility compliance.

Big W — Senior Front-End Engineer

10/2023 – 02/2025 · Contract

High-traffic national e-commerce platform supporting millions of users across checkout and payments.

- Contributed to frontend architecture and development of checkout and payment flows using Next.js with SSR.
- Delivered cross-stack features with Node.js and NestJS, improving reliability and performance.
- Acted as tech lead on a hackathon-winning team, delivering a production-ready solution.

Kablamo — Senior Front-End Engineer

05/2022 – 09/2023 · Contract

Data-intensive dashboards and public-facing platforms for emergency services and Web3 products.

- Built aviation safety and bushfire prediction dashboards using React, TypeScript, and Mapbox.
- Delivered geospatial visualisations for risk analysis and scenario modelling.
- Developed Web3 UI flows for NFT exchange, including wallet integration and transactions.

Revenue NSW — Senior Front-End Engineer

09/2021 – 05/2022 · Contract

Government payments platform handling high-volume, compliance-driven financial transactions.

- Designed and implemented accessible, user-centric payment flows for Land Tax applications.
- Improved UI consistency and maintainability using React, Redux, and Storybook.
- Contributed to technical interview assessments and coding tests.

Kablamo — Senior Front-End Engineer

03/2021 – 09/2021 · Contract

Media and emergency-response platforms focused on user content and real-time geospatial insights.

- Built upload and review functionality for ABC triple j Unearthed with a strong accessibility focus.
- Developed critical infrastructure mapping layers for bushfire analysis using Mapbox and deck.gl.

Centennial Coal — Senior Front-End Engineer

06/2019 – 11/2020 · Contract

Internal dashboards supporting real-time monitoring across multiple industrial sites.

- Sole frontend owner across seven applications, including real-time dashboards and reporting tools.
- Delivered responsive UIs for desktop and mobile, including React Native apps.
- Built configurable workflow and board-style tools tailored to operational needs.

Anditi — Front-End Engineer

09/2017 – 05/2019 · Contract

Browser-based 3D and geospatial applications for measurement, modelling, and data visualisation.

- Designed and built a 3D measurement platform using Three.js for inspecting complex models in-browser.
- Implemented spatial tools and optimisations (octree indexing) for accurate, performant interaction.
- Delivered data-driven applications for solar planning and energy estimation.

SELECTED WORK

Design systems, geospatial visualisation platforms, and high-traffic commerce UIs.

EDUCATION

Master's in Computer Science & Mathematics
